Question	Answer	Marks	Partial Marks	Guidance
13		**4**	**B1** for $y = 2$ solid line **B1** for $y = x - 1$ solid line **B1** for $y = -3$ dashed line **B1** for correct region identified satisfying the given inequalities	Penalise first occurrence of dashed/solid error. Lines can be any length and condone good freehand. Mark intention if lines slightly out on template points. Do not penalise again for the B1 region mark if lines are not solid/dashed as they should be. Mark *R* first, if no *R*, mark **unshaded** region. If their *R* (or unshaded region) spans more than one region apply the choice rule and mark the worst.
14(a)	2	**1**		
14(b)	240	**3**	**M2** for correct complete area statement e.g. $\frac{1}{2} \times 20 \times 10 + 7 \times 20$ oe or **M1** for one correct area	$\frac{1}{2} \times 20 \times (17 + 7)$, $\frac{1}{2} \times 20 \times 10 + (17 - 10) \times 20$ $100 + 140$, $20 \times 17 - \frac{1}{2} \times 20 \times 10$ Implied by 100 or 140 e.g. M1 for $20 \times 17 - k$ or $340 - k$ where $k \neq 0$
15	60835	**2**	**M1** for $40\,000 \times \left(1 + \frac{15}{100}\right)^3$ oe	Answers 60800, 60830 or 60840 without 60835 in the working score M1 only. For M1 isw if 40 000 subtracted $40\,000 \times (1 + 15\%)^3$ is not sufficient for M1
16	$\frac{17}{20}$ oe	**1**		Allow any equivalent e.g. $\frac{51}{60}$, 0.85, 85%. Ignore incorrect cancelling or conversion following a correct answer provided conversion is to an acceptable form i.e. not ratio 17 : 20 and not words 17 in 20.
